Take the Paris Pledge

Take the Paris Pledge and commit to reducing your carbon pollution by 50% by the year 2030 and to be carbon neutral by 2050. Together, we can make a real difference!

When you take the pledge, Minnesota Interfaith Power & Light will provide you with helpful resources and tools so you can reach (and maybe even exceed) these commitments.

At the end of 2015, leaders from across the world will meet in Paris to negotiate an agreement on how climate change can be slowed. Interfaith Power & Light will tally all pledges and share these results with the global community in Paris. By living as examples, we will show our world leaders that we believe change is not only possible, but happening now.

Will you join us? Sign the Paris Pledge and together we can show that a brighter future is within reach.
